

# APIX Benchmark

APIX working group on Benchmarking @ APIX 25  
Mike Gaertner (gaertner.mike@cnx.net.kh)

# Review

- APIX benchmark was agreed on at APIX 24 initiated by APNIC
- Benchmark survey was developed by APIX with facilitation help from APNIC
- Introduced at APIX 25 (Feb 2022)
- Survey failed to gather a significant response (only 7 surveys completed)
- All survey data (7) was collected in the first week after the introduction, later request resulted in 0 additional results\* (we got 1 more in September)

Survey: <https://tinyurl.com/APIX2022>

# Problem

- Survey was designed to be anonymous, so it was not possible to follow-up with individual members
- Survey used APNIC's survey monkey account, and access to data could only be provided by export from APNIC staff

# Moving forward

- Does APIX community want to continue the project?
- Would members agree we track the exchange name and follow up with members who did not yet fill in the survey?
- Would your exchange fill out the survey?

# The survey ....
