## Use Case 1

- Bangalore Based company Intime Netralaya :  
For AWS, Before DE-CIX Direct CLOUD :  
Latency @330ms, after DE-CIX DirectCLOUD:  
Latency @40ms.
- Similar to this, various other companies  
being served such as

Udaan

GODFREY PHILLIPS  
—INDIA LIMITED—

JUBILANT  
ENPRO

# 10x cliental

DirectCLOUD Capacities available from 50M to 10G.

## How to implement?

DirectCLOUD is a dedicated connection between your infrastructure and a chosen cloud service provider:

- Step one: ISPs or data centers transport their enterprise customers to DE-CIX, or enterprises connect directly to DE-CIX.
- Step two: DE-CIX extends the connection into the selected cloud – offering a private, secure direct connection with low latency.

# Awards!
